DETAILED ACTION

Claim Rejections - 35 USC § 103

- 1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 2. Claims 1 and 2 are rejected under 35 U.S.C. 103(a) as being unpatentable over admitted prior art (AAPA) in view of Funamoto (US 5,949,505).

AAPA discloses a device comprising a multi-domain vertical alignment thin film transistor liquid crystal display panel (Fig. 1); a first wide viewing film (112) on a first surface of the thin film transistor liquid crystal display panel; a first polarizer film on the first viewing film (100); a second wide viewing film (108) on a second surface of the thin film transistor liquid crystal display panel; and a second polarizer film (110) on the second wide viewing film.

Funamoto discloses a device wherein a surface of a polarize film has a diffusive pattern, wherein the surface of the polarizer film has a patterned surface as to form the diffusive pattern (col. 4, lines 11-19)

It would have been obvious to one having ordinary skill in the art at the time the invention was made for the polarizing film to have a diffusive pattern so that light can be evenly radiated from the polarizer (col. 4, lines 11-19).

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Richard H. Kim whose telephone number is (571)272-2294. The examiner can normally be reached on 9:00-6:30 M-F.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Robert H. Kim can be reached on (571)272-2293. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
